

STUDENT HEALTH SERVICES

For students seeking diagnostic, preventive and therapeutic health services:

Adjacent to the campus of WVSOM sits the Robert C. Byrd Clinic, a multi-specialty clinic providing care in Family and Internal Medicine, Pediatrics, Behavioral Medicine, and Osteopathic Manipulative Therapy. The clinic also has on-site radiology services including ultrasound. The lab provides on-site CLIA waived services as well as serving as a drawing station for reference laboratory services. Both the Robert C. Byrd Clinic and Lab Corp are providers for the school sponsored health insurance.

WVSOM students have access to the clinic for their health care needs, including diagnostic, preventive, and therapeutic health services.

The health service fee, a part of the student's total tuition and fee schedule, pays for the student's clinical co-pay for health care services rendered by the physicians and staff of the Robert C. Byrd Clinic (RCBC).

The health service fee will not be applied to:

- Health insurance policy deductibles;
- Health care rendered off site (hospital, laboratory service, radiology fees, etc.);
- Health care services provided by entities at the RCBC facility not owned by RCBC, which currently is Laboratory Corporation of America (LabCorp)
- Any services or procedures specifically excluded by the student's health insurance policy.

Contact Information

Clinic location

1464 Jefferson Street North, Lewisburg, WV 24901

After Hours Care

A provider is available to speak to students on a 24 hours a day basis, seven days a week:

Phone: 304.645.3220

Students in years three and four may still schedule their diagnostic preventive and therapeutic care through the Robert C. Byrd Clinic.

Those requiring emergent care or whom are advised by the clinic to go to an emergency room should go to the emergency room of their base site hospital for evaluation. If advised to go to an urgent care facility, a list of sites in each SWC region is available on the website.

Students on elective or selective rotations out of state should contact their insurance provider to locate a participating facility. To contact member services of the student health policy provider, call the toll free number on the back of the insurance ID card.
